SONOREX TECHNOLOGY MB 210.2 B LIFTING DEVICE

The lifting device makes work easier for the operator. It enables automatic oscillation into the cleaning or rinsing bath and facilitates the transport of the filled product baskets from tub to tub. The slowly oscillating up and down movement increases the cleaning effect of the ultrasound and the dissolved dirt is rinsed off better.

- The filled cleaning basket is hung manually in the lifting device. By switching the timer, the lifting device lowers the basket into the tub and automatically starts oscillation. After the timer has expired, the oscillation stops and the lifting device automatically lifts the basket out of the tub back into the starting position.- The lifting device is pushed manually with the suspended basket to the next tub.
- By switching the timer, the lifting device lowers the basket into the tub and automatically starts oscillation again.
